In Germany Norfolkline operates from Lubeck and provides Intermodal services to Italy, and both ambient and refrigerated services to the UK & Ireland and Scandanavia. Longer transport distances are undertaken on rail to offer our clients an efficient and environmentally friendly solution for their transport requirements (maximum payload 28 tonnes).

Along with our scheduled services express freight is currently available from Norfolkline Germany and is already popular with a number of key automotive manufacturers in the country. This facility enables supply chains to work on a Just in Time (JIT) principle, reducing stock requirements and subsequently providing benefit to our clients through lower costs.
