Das Unternehmen Ringfeder Power Transmission GmbH bietet Ihnen Maschinenbau, Maschinenelemente, Dämpfungstechnik, Kupplungen und Antriebstechnik.

Business area RINGFEDER POWER TRANSMISSION consists of the German company Ringfeder Power Transmission GmbH and the American company Ringfeder Corporation.

RINGFEDER POWER TRANSMISSION develops, manufactures and markets products for advanced applications within widely differing areas for power transmission.

RINGFEDER POWER TRANSMISSION's biggest customer group is found in the broad industrial market, with a focus on the machinery, power and mining industries.

The business area is also an important supplier of special products to the train, boat and aircraft industries. The volumes are small, but the segment creates an image and proves RINGFEDER's high level of technology and quality.

RINGFEDER POWER TRANSMISSION is the only player in its product segment with substantial sales to the three largest machine-manufacturing countries: Japan, Germany and the USA. The RINGFEDER brand is also well known on growth markets in Asia and South America.
